Profile

Passionate software engineer with extensive experience in JavaScript and Web development, coupled with a strong background in system operations. Currently pursuing a Master's Degree in Software Architecture and Application Development at INGETIS Paris and looking for a CDI/CDD from July 2026.

Professional Experience

Software Engineer | JoyatWork

Backend Engineering | Oct 2025 - Jan 2026

-Built Laravel backend features with APIs, middleware, service logic for booking/onboarding workflows, with validation rules and MySQL migrations.
-Implemented secure token-based authentication and role-based access control (RBAC) using Laravel Sanctum for account management workflows.
-Optimized key endpoints with caching and query improvements, reducing response time by 30%.
-Automated the delivery pipeline with GitHub Actions, reducing manual work through CI checks and release workflows.

Software Engineer | Articode

Backend Engineering | Oct 2023 - Aug 2025

-Contributed to microservices architecture development, boosting modularity and scalability of backend
-Enhanced database and Redis integrations for optimized data management and caching, while implementing advanced rate-limiting for traffic.
-Designed validation, structured JSON logs, and error handling to make failures easier to diagnose.
-Management and automation of infrastructure (Kubernetes, RMQ, PostgreSQL, GitLab, ELK) with Terraform and Ansible, reducing deployment time by 40% and enhancing operational efficiency and cross-account access.
-Scaling the metrics infrastructure with Prometheus and Grafana dashboards to improve systems visibility, and optimization of systems logging and tracing with ELK (Kibana, Logstash, Elasticsearch) to accelerate log collection and analysis.
-Improved code quality by adding automated tests and enforcing SonarQube quality gates.

AR Engineer | Jun 2023 - Oct 2023

-Helped deliver a WebGL-based AR web application, documented implementation choices, and coordinated execution across a four-intern team.
-Worked in a shared review and iteration workflow, which improved teamwork, handoff clarity, and delivery pace.

Software Engineer | Fondation Zakoura Education

Information Systems | Jul 2022 - Oct 2022

-Provided day-to-day technical support across internal systems, reducing resolution time and improving team productivity.
-Developed SQL queries and contributed to .NET API endpoints to streamline education workflows and simplify internal data access.

Technical Skills

Languages: TypeScript/JavaScript, Python, C#, Java, PHP, SQL
Backend & APIs: NestJS, Node.js/Express, Laravel, ASP.NET, REST APIs, OpenAPI/Swagger, JWT/OAuth
Data & Storage: PostgreSQL, MySQL, SQL Server, Redis, Drizzle ORM, schema design, migrations, query tuning, caching
DevOps & Infrastructure: Docker, Kubernetes, Terraform, Ansible, Linux, Bash, PowerShell, GitHub Actions, GitLab, Jenkins
Observability & Quality: Prometheus, Grafana, ELK, SonarQube, Kafka, RMQ, Playwright, Cypress, PHPUnit, Vitest, Jest
Architecture & Security: Microservices, Monorepos, MVC, Clean/Hexagonal, DDD, TDD, OWASP, OIDC, IAM

Projects

EcoTrack | Smart urban waste management platform

GitHub: github.com/Oussamaredd/EcoTrack | live demo: ecotrack-jmj.pages.dev

-Smart IoT waste management platform for citizens, field agents, and mamagers, featuring telemetry traffic ingestion, route planning, live updates.
- Technologies: React, NestJS, Drizzle ORM, PostgreSQL, Kubernetes, MQTT, Kafka

PhotoSharingApplication | Nature gallery photo web app

GitHub: github.com/Oussamaredd/PhotoSharingApplication

-Built a nature photo gallery application designed to make users share and browse photos in a simple and intuitive way with smoother experience.
- Technologies: C#, ASP.NET Core, ASP.NET identity, ASP.NET Web API, React, Entity Framework, SQL Server, Bootstrap

Partage et Vie Equipment Reservation | Equipment reservation system

GitHub: github.com/Oussamaredd/partage-et-vie-equipment-reservation

-Equipment reservation system designed to manage requests, availability, and reservation workflows.
- Technologies: VueJS, PHP, Symfony, Doctrine, Docker, Github Actions (CI/CD)

Algoan Playwright | End-to-end bank transaction flow automation

GitHub: github.com/Oussamaredd/algoan-playwright

-End-to-end bank-transaction flow automation with Playwright, covering consent and selection with CI execution, failure artifacts for faster debugging.
- Technologies: TypeScript, Playwright, OpenAPI (Swagger), Github Actions (CI/CD)

Education

-Master's Degree, Software Architecture and Application Development | INGETIS, Paris, France | September 2025 – July 2026
-Master's Degree, Computer Science and Networks (MIAGE) | EMSI, Casablanca, Morocco | Graduated 2023

Languages

Arabic (Native) | French (Fluent) | English (Fluent)

Certifications

-Honoris 21st Century Skills Certificate
-AI Fluency: Frameworks & Foundations
-Claude Code in Action
-Building with the Claude API
